EDUCATION

University of California, Davis
B.S. Statistics, B.A. Economics

September. 2022 - June. 2026
Davis, CA

COURSEWORK

Big Data & High-Performance Statistical Computing, Fundamentals of Statistical Data Science, Regression Analysis, Applied Time Series Analysis, Analysis of Variance, Multivariate Data Analysis, Mathematical Statistics

EXPERIENCE

UC Davis Global Affairs

September. 2025 - August. 2026

Data Assistant

Davis, CA

- Streamlined data reporting by transferring and cleaning data from Excel spreadsheets into the university's international programs database, improving accuracy and accessibility of over 10,000 records
- Developed a custom website in HTML, CSS, and JavaScript, integrating a REST API to pull and display live institutional data through a dynamically updating dashboard for 12 staff
- Automated data cleaning and reporting workflows using Power Query and VBA, generating regular reports for supervisors and cutting manual processing time

Elsevier

June. 2025 - August. 2025

Data Analyst Intern

San Francisco, CA

- Evaluated research performance and collaboration patterns across 140+ global institutions through data visualization and exploratory analysis, enabling strategic decision-making for a major R1 university
- Cleaned and transformed 50,000+ data points from bibliometric, grant, and institutional sources using Python, SQL, and Excel to support scalable analysis of research KPIs, including field-weighted citation impact, influence in patents and public policy, top citation percentiles, and international co-authorship intensity
- Applied regression analysis and K-means clustering on bibliometric and funding data to identify key drivers of research impact

UC Davis Department of Economics

March. 2025 - June. 2025

Undergraduate Research Fellow

Davis, CA

- Supported a research project evaluating the effectiveness of natural language processing in identifying government spending news by comparing model results with 2,400+ manually labeled news articles
- Annotated 1,000+ newspaper articles to flag government spending references and construct a benchmark dataset for supervised model evaluation
- Applied NLP techniques in Python using spaCy, including keyword filtering, named entity recognition, and TF-IDF scoring, to classify spending-related content, achieving an AUC of 0.86 in model performance

TECHNICAL SKILLS

Skills: Python, SQL, R, Stata, Git, API Integration, Tableau, Excel, Salesforce, KPI Dashboards, Regression Analysis, Predictive Analysis
Libraries/Frameworks: pandas, numpy, scipy, statsmodels, spaCy, matplotlib, seaborn, BeautifulSoup, Scrapy

PROJECTS

College Sports Impact on University Admissions Metrics

- Built a data pipeline and applied OLS regression with log-transformed admissions data and robust error estimation to analyze the impact of major collegiate sports wins on application trends using pandas, statsmodels, and fuzzy string matching

Healthcare Outcomes and Socioeconomic Inequality Analysis

- Developed OLS, multivariate, and logit regression models in Stata to evaluate how income levels, insurance coverage, unemployment, housing, and healthcare access impact preventable hospitalization rates across 2,900+ U.S. counties. Generated insights demonstrating how socioeconomic inequality and limited access to care contribute to higher hospitalization risks

LEADERSHIP

Alpha Sigma Phi - Zeta Gamma Chapter

May. 2024 - June. 2026

VP of Finance

Davis, CA

- Manage a \$20,000 annual budget, optimizing expenditures, and implementing cost-saving strategies
- Oversee financial operations, ensuring timely dues collection with structured deadlines and flexible payment plans while maintaining transparency through regular budget reports
- Plan and execute large-scale events, including formals, retreats, and philanthropic initiatives, handling budgeting, logistics, and vendor relations for seamless execution
